

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-20. (Cancelled)

21. (Currently Amended) A sender for transmitting a content file to an end user terminal ~~a receiver~~, said sender comprising:

means for dividing the content file into a first part and a second part;

means for sending the first part to the end user terminal ~~receiver~~ via at least one cache server;

means for encrypting the second part without using the at least one cache server;

means for generating a key necessary for decrypting the encrypted second part;

means for sending the encrypted second part to the ~~receiver~~end user terminal via a second network; and

means for sending the key to the end user terminal via a third network.

22. (Original) The sender of claim 21, further comprising means for sending the encrypted second part via a different network than the first part.

23. (Currently Amended) The sender of claim 21, wherein said encrypted second part comprises vital data of said content file and the unencrypted first part comprises streamed data without the vital data.

24. (Original) The sender of claim 21, wherein the first part comprises video data and the encrypted second part comprises audio data, or the first part comprises audio data and the encrypted second part comprises video data.

25. (Original) The sender of claim 21, wherein said sender is arranged to transmit said content file using a streaming protocol.

26. (Original) The sender of claim 21, wherein encrypted data in the encrypted second part comprises predetermined frequency components of the content file.

27. (Currently Amended) A telecommunication system comprising:
a sender, wherein the sender comprises:

means for dividing a content file into a first part and a second part;

means for sending the first part to an end user terminal ~~the receiver~~ via
the at least one cache server;

means for encrypting the second part without using the at least one cache
server;

means for generating a key necessary for decrypting the encrypted
second part; and

means for sending the encrypted second part to the receiver end user
terminal via a second network; and

means for sending the key to the end user terminal via a third network;
at least one communication network; and
at least one cache server.

28. (Currently Amended) The telecommunication system of claim 27,
further comprising at least one end user terminal ~~receiver~~ arranged for communicating
with said sender via the at least one cache server and for communicating with said
sender without using ~~[[a]]~~ the at least one cache server.

29. (Original) The telecommunication system of claim 28, wherein said at
least one cache server is arranged for communicating with more than one sender, said
more than one sender using the same or different encryption.

30. (Original) The telecommunication system of claim 28, wherein said at least one cache server is arranged for communicating with more than one sender, said more than one sender using watermark techniques.

31. (Currently Amended) A method of transmitting a content file from a sender to a receiver an end user terminal wherein said method comprises the following steps; operations:

dividing the content file into a first part and a second part;
sending the first part to the end user terminal receiver via at least one cache server;
encrypting the second part without using the at least one cache server; and
generating a key necessary for decrypting the encrypted second part;
sending the encrypted second part to the receiver. end user terminal via a
second network; and
sending the key to the end user terminal via a third network.

32. (Original) The method of claim 31, further comprising
sending the encrypted second part via a different network than the first part.

33. (Currently Amended) The method of claim 31, wherein said encrypted second part comprises vital data of said content file and the unencrypted first part comprises streamed data without the vital data.

34. (Currently Amended) The method of claim 31 [[21]], wherein the first part comprises video data and the encrypted second part comprises audio data, or the first part comprises audio data and the encrypted second part comprises video data.

35. (Currently Amended) The method of claim 31 [[21]], further comprising

sending said content file using a streaming protocol.

36. (Currently Amended) The method of claim 31 ~~sender of claim 21,~~
~~wherein~~ encrypted data in the encrypted second part comprises predetermined
frequency components of the content file.

37. (Canceled)

38. (New) The sender of claim 21, wherein the third network comprises a
short message service (SMS) network and the key is included in a short message
service message.

39. (New) The telecommunication system of claim 27. wherein the third
network comprises a short message service (SMS) network and the key is included in a
short message service message.

40. (New) The method of claim 31. wherein the third network comprises a
short message service (SMS) network and the key is included in a short message
service message.
